### ECOWASH – The Environmental Plate Washout Solution

---

ECOWASH is the latest generation of environmentally friendly flexographic plate washout solutions. ECOWASH combines high productivity, low odor, zero toxicity and ease of use.

---

#### **ECOWASH features and benefits:**

- Low odor under normal ventilation conditions (10-15 turns/hour)
    - More agreeable, healthier work environment
  - Non-toxic
    - Improved worker safety
    - Reduced environmental compliance costs
  - Rapid plate processing, low plate swelling
    - Faster drying times
    - Better definition and less dot loss
    - No “orange peel” effect
  - ECOWASH operates at a wide temperature window
    - Potential Energy and Insurance savings
    - Improved safety
  - Polymer and digital layer remains in suspension
    - Maintains processor clean, especially with digital plates
    - lower maintenance costs
  - No ADR Transport Regulation
- 

#### Add-back Procedure:

- After distillation, add fresh Ecowash at 10% of final volume
- Top up, if necessary with fresh Ecowash.

We recommend performing periodic tests of wash-out rate as part of your quality control program. If a consistent downward trend in wash-out rates is observed over time, this may indicate a sub-optimal distillation process.
